

**FAASTeam presents:**

# **FAA Launches New Drone Rules and what they mean to YOU**

On August 29, 2016, the Federal Aviation Administration's (FAA) new comprehensive regulations went into effect for routine, non-recreational use of small unmanned aircraft systems (UAS) – more popularly known as “drones.” The provisions of the new rule – formally known as part 107 – are designed to minimize risks to other aircraft, and people and property on the ground.

Testing centers nationwide can now administer the Aeronautical Knowledge Test required under part 107. After you pass the test, you must complete an FAA Airman Certificate and/or Rating Application at:  
<https://iacra.faa.gov/IACRA/Default.aspx> to receive your remote pilot certificate.

The new regulations don't apply to model aircraft operations, as defined in Section 336 of Public Law 112-95 (now codified in part 101), as long as the model aircraft operates only for hobby or recreational purposes.
